

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

**FOOD PRODUCTS BROUGHT BY STEERAGE PASSENGERS FROM PORTS OR PLACES INFECTED WITH CHOLERA.**

Attention is called to paragraph 27 of the special regulations on account of cholera, to be enforced at foreign ports, which provides as follows:

27. Certain food products, viz, unsalted meats, sausages, dressed poultry, fresh butter, fresh milk (unsterilized), fresh cheese, coming from cholera-infected localities, or through such localities, if exposed to infection therein, should not be shipped. Fresh fruits and vegetables, from districts where cholera prevails, shall be shipped only under such sanitary supervision as will enable the inspector to certify that they have not been exposed to infection.

At domestic ports, to supplement the above regulations, it is hereby ordered that food products brought by steerage passengers or members of the crew from ports or places where cholera prevails, in violation of paragraph 27, Quarantine Regulations, whether brought in trunks, hand baggage, or on the persons of immigrants or members of the crew, shall be removed to the quarantine station. Said food products and others, including water supplies, which in the opinion of the quarantine officer may be infected, shall be destroyed or held until by careful examination it is determined that they are free from infection, and if allowed entry must be accompanied by a written certificate in each case.

R. O. BAILEY, *Acting Secretary.*

**SMALLPOX IN THE UNITED STATES.**

In the following tables the States indicated by an asterisk are those from which reports of smallpox are received only from certain city, and in some cases county, boards of health. In these States, therefore, the recorded cases and deaths should not be taken as showing the general prevalence of the disease. In the States not marked by an asterisk the reports are received monthly from the State boards of health and include all cases reported throughout the State.
